INTRODUCING BERGO ELAN

4 Years • 5 Countries

WHO WE ARE

BERGO PRO UK Limited is a British company specialising in building materials, with regional headquarters, BERGO PRO Building Materials Trading LLC, located in Dubai Industrial City (DIC), UAE.

A key player in the Gulf Cooperation Council (GCC) region, **BERGO PRO** is dedicated to delivering innovative B2B solutions tailored specifically to the needs of the furniture manufacturing, flooring and WPC markets including the **UAE, Qatar, Oman, Saudi Arabia, and Bahrain.**

MISSION & VISION

What sets BERGO PRO apart is our commitment to a demand-driven business model that focuses on initiative-taking research and development (R&D). This approach allows us to continuously introduce innovative products that grant our customers a competitive edge.

Moreover, our clearly defined strategy prioritises market-oriented solutions over conventional manufacturing methods, enabling us to address the specific architectural and furniture requirements of the GCC region.

Operating from our headquarters in Dubai, BERGO PRO manages dedicated teams across the GCC to ensure seamless service delivery. As we aim to expand our footprint into other Middle Eastern and North African (MENA) markets, we are actively seeking manufacturing partners and distributors to complement our existing relationships with direct customers.

Our vigilant monitoring of industry trends and emerging technologies ensures that we remain at the forefront of innovation, thus driving commercial success for all stakeholders involved. The GCC represents a wealth of opportunities, and we foresee robust growth potential as we reinforce our presence in this dynamic market.

SEAMLESS BY DESIGN

ELAN is BERGO's furniture detailing and modular system, developed to define how furniture is structured, detailed, and visually resolved. The range comprises aluminium modular shelving systems, integrated handle solutions for kitchen furniture (vertical and horizontal), kitchen plinth systems primarily manufactured from PVC, and other kitchen furniture-related accessories. ELAN is designed to support clean, minimalist furniture applications while remaining flexible enough for use across a wide range of interior environments.

What ELAN Does

ELAN addresses the detailing layer of furniture systems. It defines how furniture elements align, integrate, and present visually, without controlling storage organisation or door movement. Rather than being applied as decorative add-ons, ELAN components are designed to be built into the furniture, creating continuity, precision, and consistency across complete installations.
